DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hedblom (U.S. Patent 5,676,488) in view of McGrath et al. (U.S. Patent 4,248,748). Hedblom discloses a surface marking including resin, thermoplastic polymers, softeners, reflecting material, and friction material (see Table at column 16-17, for example). There are at least two layers (Figure 2, for example) including a wear layer (see abstract, for example) and a heat-activatable adhesive material (column 11, lines 18-23, for example). Hedblom is silent regarding the heat-activatable adhesive to adhere the marking to the surface; however, the marking is clearly intended to be adhered to the surface. McGrath et al. disclose a heat activatable adhesive and specifically teach it for use to adhere a marking to a roadway surface (column 4, lines 41-43, for example). In view of this teaching, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the adhesive of McGrath et al. with the marking of Hedblom in order to obtain a secure placement on a roadway. The adhesive layer is deemed to meet the recitations regarding thickness. Regarding the process limitations, note that Hedblom could have been applied in a partially molten state, and could have been applied with the relative application temperatures.

Response to Arguments

Applicant's arguments filed November 26, 2003 have been fully considered but they are not persuasive. Applicant's discussion of the differences between the manner in which the present invention is applied compared to the prior art is noted; however, these limitations are process limitations which do not further limit the apparatus claims. In other words, Hedblom and McGrath et al. could have been applied in the manner claimed; therefore, the surface marking, which is an apparatus, continues to meet claim recitations.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.

Application/Control Number: 09/896,795

Art Unit: 3671

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 703-308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
